

Paarl Girls High

We conducted a survey before the program and then immediately afterwards. In the before the talk survey we wanted to find out what percentage use drugs, have used, want to try or neither. After the talk they complete another survey from which we ascertain what change there has been in each group.

This survey was completed by most. The results are as follows;

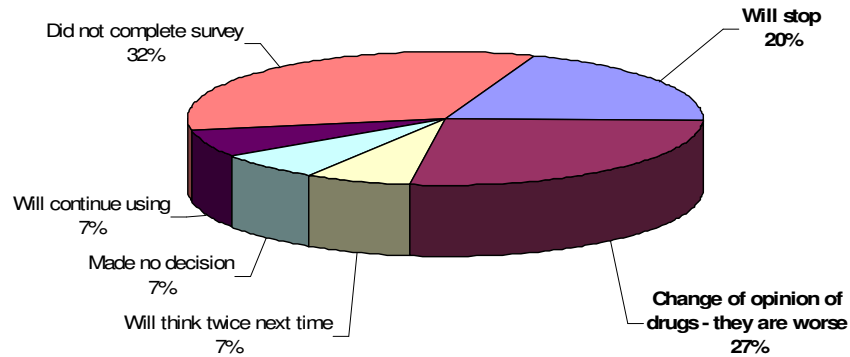

We then delivered the program. The purpose is to give them enough information to prove that no matter how nice drugs may be or how "cool" or fashionable it is to take them, that drug use does not make life better.

We also intend to inspire them to pass on what they have heard to help prevent others from using.

In the "After Talk Survey" we tracked the changes in each of the above groups, to see how close we came to our objectives. The results are as follows;
